

Java ArrayList Coding Problems with Solutions

1. Add elements to an ArrayList and print it.

```
List<String> list = new ArrayList<>();  
list.add("Apple");  
list.add("Banana");  
list.add("Orange");  
System.out.println(list);
```

2. Insert an element at a specific position.

```
list.add(1, "Mango"); // Inserts Mango at index 1
```

3. Remove an element by index.

```
list.remove(2); // Removes the element at index 2
```

4. Remove an element by value.

```
list.remove("Banana"); // Removes "Banana" from the list
```

5. Get an element at a specific index.

```
String fruit = list.get(0); // Gets the first element
```

6. Find the index of a given element.

```
int index = list.indexOf("Apple");
```

7. Replace an element at a given index.

```
list.set(1, "Grapes"); // Replaces element at index 1
```

8. Iterate over an ArrayList using a for loop.

```
for (int i = 0; i < list.size(); i++) {  
    System.out.println(list.get(i));  
}
```

9. Check if an ArrayList is empty.

```
if (list.isEmpty()) {
```

```
        System.out.println("List is empty");  
    }
```

10. Find the size of the ArrayList.

```
int size = list.size();
```
